

Silverberget

Characteristics

Silverberget is a slab at about 20 m with several high quality routes. It is all about trad climbing at this crag and it is well worth a visit. The routes follow vertical cracks for the most part. There are suitable trees to anchor to at the top out. The crag consists of firm coarse granite with good friction. The wall is facing south west and the sun reaches it after 11.00 a.m. in the summer. A nice crag to climb in the spring. Moreover it dries relatively quickly after rain. It is a good place for footwork training, crack climbing and belaying with nuts and friends. There are several easy routes. A crag suitable for climbing beginners and organizing courses at. The crag has 6 routes that are especially recommended. 6 . See the ones marked with a star ☐.

Directions

The crag is located about 44 km north west of **Västervik**. From Västervik follow the E22 towards Gamleby. Take road 134 towards Kisa and turn right after 2 km onto road ---. Continue for 7 km and turn left at the Kila 5 sign. Follow the gravel road until you arrive at the small village of Kila. Thereafter follow the road as it turns left and drive about 500 m until the road turns sharply to the left. Park to the right on the spot of grass by the curve. Follow the path leading into the forest. It is marked. You will arrive at the crag after 5 minutes of walking. The crag is located 70 km from **Linköping**. Take road 35 and drive past Åtvidaberg. After 3 km turn right onto road 134 towards Kisa. After about 1 km turn left towards Dalhem. Follow the road for about 26 km. Thereafter turn left at the Kila 5 sign. Follow the gravel road until you arrive at the small village of Kila. Thereafter follow the road as it turns left and drive about 500 m until the road turns sharply to the left. Park to the right on the spot of grass by the curve. Follow the path leading into the forest for 700 m. It is marked.

Coordinates
