

# Tjursbo

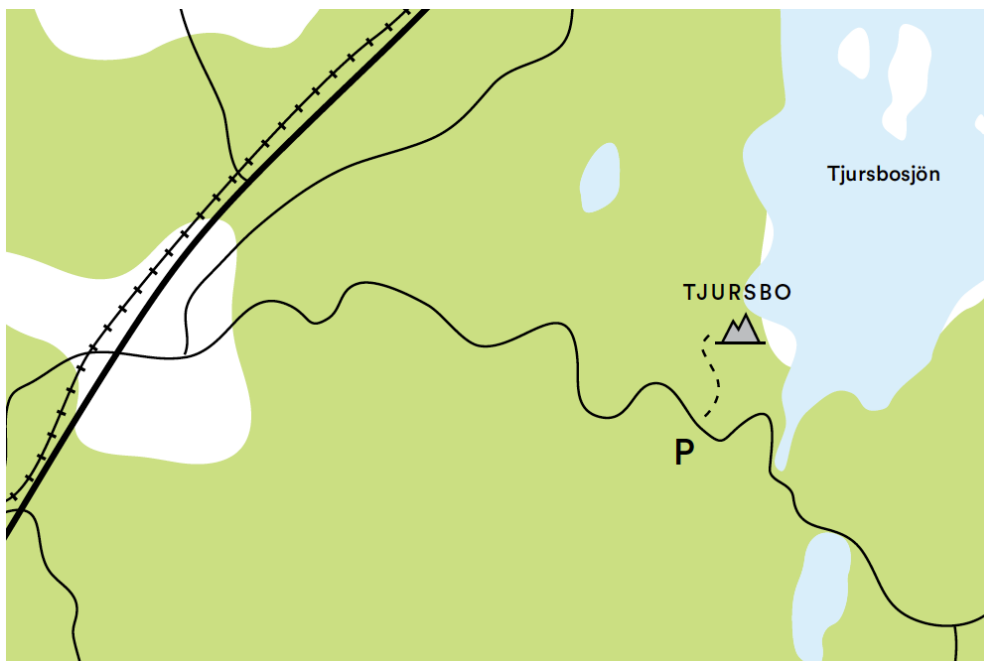

## Characteristics

The rock consists of high-quality granite. One of Småland's steepest craggs with many overhanging routes of high class. The crag is over 20 m high and is east-facing and with sun until 14.00. You can camp by the lake and swim in it. You need a 50 m rope. Especially good conditions in summer.

## Directions

The crag is located by Tjursbosjön about 7 km east of Ankarsrum and 22 km south of Västervik. From E22 turn west on road 33 to Vimmerby. After the TV mast on the left side, turn left and drive south toward Ankarsrum at sign Gustavsberg. After 4 km turn left at sign Ekenäs (Jungfrugöl) and there's a small house on left.

Drive 1,8 km on the gravel road and stop at the small parking on the left side. Don't drive down the slope to a house. The path is marked. Follow the path a little to the left. Keep left when you are at the top on the crag and see the lake. Scramble down and go to right and you will arrive first to the Intro vägen.
