

Characteristics

VO is a big area that consists of boulders and walls surrounded by forest. The climbing are on granit with high quality. The landings are good for the most part. Parts of the area are close to a sports centre and are easily accessible by road from the city. VO is divided into several sections: Sebulba, Hyllan, Dillerium, Havet, Engard and Sjöstenen. We started to climb here in the beginning of the 90 thenth. There are several classics problem to climb.

Directions

'Sebulba', 'Dillerium' and 'Sjöstenarna' are located by the 2.5, 5, and 10 km running tracks at the Karstorp sports ground which is close to the fire station in the centre of Västervik. When you leave the track, the trail is marked. Park at the sports ground or the industrial estate at Dichmansstreet. Walk the small road to a shelter and then along the tracks for 300 m and you are coming to the first area called Sebulba. Follow the marks to hyllan and other boulders.
